PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building and deploying applications using **React, TypeScript, C#, C++, JavaScript, Python, and SQL**. Built and released a self-hosted project management application with Google Drive synchronization and continuously developing a modular Unity/C# RPG. Strong foundation in software architecture, API integration, debugging, and object-oriented programming.

EDUCATION

St. Mary's University, San Antonio, TX Dec 2024

Bachelor of Science in Computer Science, Minor in Mathematics

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Databases, Computer Networks, Object-Oriented Programming, eLearning and Gamification

TECHNICAL SKILLS

Languages: C#, C++, TypeScript, JavaScript, Python, SQL, C, Assembly, HTML/CSS
Frameworks & Technologies: React, Vite, Unity, Google Drive API, Google OAuth / Identity Services, REST APIs
Development Tools: Git, GitHub, Visual Studio, VS Code, Wireshark, RStudio, Microsoft Office
Software Engineering: Object-Oriented Programming, Agile, API Integration, Debugging, Version Control, Documentation
Deployment: Caddy, Cloudflare Tunnel, HTTPS, Self-Hosting

PROJECTS

Dat's: Better Kanban v1.0 - React/TypeScript Project Management Application August 2026 – October 2026

- Developed a responsive project-management application with customizable drag-and-drop Kanban workflows, editable pipelines, task priorities/deadlines, attachments, and timeline/history views.
- Integrated Google OAuth and the Google Drive API to store project data, configuration, tasks, and uploaded attachments in users' own Drive accounts.
- Implemented near-live, conflict-aware synchronization using local, baseline, and remote state comparison with pre-save validation to detect concurrent changes and reduce accidental overwrites.
- Deployed and self-hosted the production Vite application over HTTPS using Caddy and Cloudflare Tunnel.

Story Game - Unity/C# RPG Project May 2026 – Present

- Built a character-creation and persistence system supporting race, subrace, lineage, background, traits, appearance, attributes, skills, saved profiles, stat resolution, and runtime character spawning.
- Designed a grid-based inventory system supporting placement, rotation, stacking, occupied-cell validation, automatic placement, equipment interaction, and storage containers.
- Implemented centralized gameplay-state and combat/resource systems coordinating movement, combat, inventory, world interaction, downed/recovery behavior, and aether-healing tolerance without tightly coupling individual systems.

WORK EXPERIENCE

Costco Wholesale - Seasonal *Food Court Employee*; San Antonio, TX November 2025 – January 2026

- Served 1,000+ customers per shift in a 3–7 member team, supporting order flow, restocking, and sanitation.

Bill Miller Bar-B-Q - *General Employee*; San Antonio, TX May 2021 – August 2024

- Served 250–400 customers per shift while maintaining order accuracy and team workflow during rushes.

HONORS AND AWARDS

St. Mary's University, San Antonio, TX

Gateway Scholarship 2021 – 2024

STMU Research Scholars Awards Nomination 2022
